

## CERT+

The AppViewX CERT+ product enables the Certificate Lifecycle Automation solution on our AppViewX Platform. CERT+ helps enterprise IT manage and automate the entire lifecycle of their internal and external PKI. CERT+ provides extensive visibility into the certificate and encryption key infrastructure which helps protect the enterprise from threats to the business. Application, network, and security engineers may self-service and initiate automation workflows that deliver compliance and true business agility.

## CAPABILITIES

### Certificate and Key Management

- Discover, create, renew, provision, and revoke certificates and keys in your multi-cloud environments.
- Automate your certificates and key lifecycles on application servers, firewalls, ADCs, and endpoint devices.
- Leverage internal and external certificate authorities in your chain of trust.

### Automated Workflows

- Automate your network infrastructure business processes.
- Design workflows using our library of tasks supporting our multi-vendor ecosystem of technology partners.
- If needed, create and maintain your own tasks.
- Expose the workflows to roles who are allowed to launch automation.

### Self-Service

- Give your teams the ability to launch automated workflows.
- Simplify self-service with user-friendly forms.
- Expose your automated workflows to programmers who can self-serve via REST APIs.

### Granular RBAC

- Automate your network infrastructure business processes.
- Design workflows using our library of tasks supporting our multi-vendor ecosystem of technology partners.
- If needed, create and maintain your own tasks.
- Expose the workflows to roles who are allowed to launch automation.

### Context Aware

- See the configuration, state, and performance of your infrastructure.
- See the changes in the network infrastructure supporting the application.
- Trigger automated workflows based on changes in the network infrastructure.
- Initiate automated workflows from context-rich and actionable dashboards.

### Multi-Vendor

- Leverage the automation tasks and workflows that we maintain and support for our ecosystem of technology partners.
- Support different versions of their solutions.
- Give your teams a multi-vendor and application centric view of the infrastructure and services supporting the application.

## Multi-Cloud

- Execute your automated workflows in public cloud, private cloud, software-defined, and hardware environments.
- Automate cloud and software-defined infrastructure in the same way as your legacy hardware infrastructure.

## Scalable, Distributed, and Modular

- Support thousands of users using our platform.
- Build automation workflows for ALL of your devices.
- Cluster the AppViewX Platform for additional performance and scale.
- Add new support for technology partners without bringing down the platform.

## SOLUTIONS

**Discovery and Visibility**

**Certificate and Key Compliance**

**Low-Code Certificate Lifecycle Automation**

**IoT and Mobile End-Points**

**Cloud and Devops**

**SSH Key Lifecycle Automation**

**Secure Key Management**

## About AppViewX

AppViewX is revolutionizing the way DevSecOps and NetOps teams deliver services to enterprise IT. The AppViewX platform is a modular, low-code software application that enables the automation and orchestration of enterprise network infrastructure and certificate management using an intuitive, context-aware visual workflow. It is built to rapidly enable users to implement crypto-agility, enforce compliance, eliminate errors, and reduce cost. AppViewX is headquartered in New York City with additional offices in the US, UK, and India. To know more, visit
